OPEN LECTURE

Professor Didier Jourdan,
Blaise Pascal University,
Clermont-Ferrand, France

Potentials and Challenges of Mixed Methods

Illustrated using the example of understanding the impact of health/wellbeing promotion programmes in complex educational systems

This lecture sets out to illustrate and discuss the potentials and challenges of mixed-method research designs with a view to capturing the complexity of health and wellbeing promotion programmes in schools. Particular focus will be placed on challenges related to the evaluation, sustainability and transferability of school-based interventions.

Didier Jourdan is a professor at Blaise Pascal University in Clermont-Ferrand, France, and is one of the leading European scholars in the field of public health and health promotion in schools.

When?
28 April 2017, 14:00-16:00

Where?
DPU/AU Campus Emdrup,
Room A-403

Who can attend?
All students and staff interested in the topic
